Engineering & Computing

Internship Opportunities

Gain experiential learning that integrates knowledge and theory learned in the classroom with practical application and skills development in a professional setting.

Internships give you the opportunity to gain valuable hands-on experience while making connections in professional fields you are considering for career paths.

Internships also provide employers the opportunity to guide and evaluate talent.

Students should begin thinking about internships during their junior year. Our programs will admit Sopmores and above, including graduates. Consultations are available to freshmen on how find internships on their own.
