Come be a part of something big! Smart Minds, Cool Jobs and Awesome Rewards! Fueled by innovation, talent and ambition, the Air Force Civilian Service (AFCS) is seeking civilian professionals prepared to deploy war-winning capabilities on behalf of the United States Air Force.

OPEN: APRIL 20, 2021
CLOSES: MAY 4, 2021

Air Force Nuclear Weapons Center (AFNWC) is currently seeking a full-time Non-Supervisory Electronics Engineer (Test and Evaluation) (960787), to work in the Minuteman III (MMIII) Systems Directorate at Hill Air Force Base, UT.

This position is an **NH-0855-03** which has a typical 2021 salary range of $77,488 - $119,787.

This position supports developmental test and evaluation of the MMIII weapon system in the Air Force Materiel Command’s (AFMC) AFNWC MMIII Systems Directorate at Hill Air Force Base, Utah.

The primary purpose of this position is to serve as a developmental test and evaluation engineer for the MMIII System covering: ground mechanical and electrical, guidance, propulsion, reentry system/reentry vehicle, real property installed equipment and support equipment. Selectee will provide test support to the program manager and his/her staff: assist in the development and review of test documents, participate in test related meetings, observe test (as required) ensuring modifications and upgrades to the Minuteman III System meets or exceeds Air Force Global Strike Command (AFGSC) and System Program Office (SPO) requirements/specifications referencing current Department of Defense/Air Force (DoD/AF) approved documents. This position coordinates mainly with AFNWC, AFMC, AFGSC and Air Force Test Center personnel to review or approve technical documents and test planning, execution and reporting.

Candidates should have a strong background in test and evaluation, technology development and systems engineering.

**DUTIES: (PRD #H31MN00024)**

- Responsible for ensuring modifications and upgrades to the MMIII system meets or exceeds AFGSC/SPO requirements and specifications through test and evaluation referencing current DoD/AF documents.
- Responsible to review, coordinate or approve technical documents, e.g. PID(s) (Program Introduction Document), SOC(s) (Statement of Capabilities), project proposals, CDRL(s) (Contract Data Requirements List), Test Plans and Reports, technical evaluations, deficiency reports source selection and Performance Work Statements.
- Reviews and coordinates technical tasks for response from support contractors.
- Support SPO Integrated Product Teams and Test Working Groups in developmental test and evaluation. Prepares and reviews technical documents, including Test and Evaluation Master Plan (TEMP), test plans, test reports, and other program-related documents.
- Supports achievement of Minuteman III Objectives/Key Results.
• Identify and resolve highly complex problems crossing organizational boundaries and promulgate solutions.
• Assigns and approves technical tasks for response from support contractors.

REQUIREMENTS FOR THE POSITION:

• **U.S. CITIZENSHIP**
  • Required to handle and safeguard sensitive and/or classified information in accordance with regulations to reduce potential compromise; employee must obtain and maintain a Top Secret security clearance.
  • This position has been designated as acquisition coded position within the Acquisition Professional Development Program (APDP). Work requires Level 2 in Test and Evaluation within the first 24 months.
  • A professional engineering degree at the bachelor’s level from an ABET accredited institution is mandatory.
  • Work may occasionally require travel away from the normal duty station on military or commercial aircraft.
  • Employee performs other related duties as assigned.
  • In accordance with the Ethics in Government Act, 1978, employee may be required to file an OGE Form 450, Confidential Financial Disclosure Report, upon appointment and will be required to file annually.
