Selected candidates will be compensated by either a stipend or salary, and may include one round trip domestic travel to and from the host laboratory. Stipends and salaries will be commensurate with cost of living at the location of the host laboratory. Housing information will be provided to interns prior to arrival at the host laboratory, and will vary from lab to lab.

What is an MSIPP internship?
The Minority Serving Institutions Partnership Program (MSIPP) is a program to promote the education and development of the next generation workforce in critical science, engineering, technology, and math (STEM) related disciplines that complement current and future missions of U.S. Department of Energy Office of Environmental Management (DOE-EM).

The MSIPP Internships program is designed to provide an enhanced training environment for next generation scientists and engineers by exposing them to research challenges unique to our industry.

MSIPP Interns will be given the opportunity to complete Summer Internships aligned with ongoing U.S. DOE-EM research under the direction of a host national laboratory. The internship will be performed at the host national laboratory, utilizing their facilities and equipment under the guidance of a senior research mentor.

Gain hands-on work experience
Collaborate with subject matter experts
Work in a collaborative environment
Connect with other professionals in their fields
Pursue growth opportunities

Apply Now!
